sion conditions.

COPYRIGHT: (C)2001,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a multicast service providing method, with which a plurality of radio terminals that go into various receiving states within a service area can respectively receive multicast information with satisfactory reception quality.

SOLUTION: In this multicast service providing method for distributing the multicast information from an information distributing device to radio terminals within the service area through a radio section, the information distributing device distributes the same multicast information according to a plurality of different transmission conditions, and the radio terminals can receive the distributed multicast information by any of the transmis-
